# CSE 406
Security Online - Firewall

Look carefully at the given topology below(the same topology as given in seed labs):

You need write the following firewall rules:

- External Hosts cannot connect via SSH to the internal host.
- No Host can connect via SSH to the router.
- Internal Hosts can connect via SSH with each other.
- Machine with IP address 10.9.0.5 can connect to 192.168.60.6 via TELNET
- No other machine can connect to any other machine via TELNET.
- Machine with IP address 10.9.0.1 can't ping any other machine
- Machine with IP address 10.9.0.5 can ping all other machines (except 10.9.0.1)
- No other machine can ping any other machine.
